“CAN I USE THIS? A Mnemonic for Usability Testing”

Presented by:

**David Greenlees
Innodev Pty Ltd**

Brought to you by:

340 Corporate Way, Suite 300, Orange Park, FL 32073
888-268-8770 · 904-278-0524 · sqeinfo@sqe.com · www.sqe.com

David Greenlees

Innodev Pty Ltd

David Greenlees has been testing software for more than ten years, many spent in one of Australia's largest government departments. More recently David has undertaken a consultant role in multiple organizations. A vocal and valued member of the context-driven testing community, he is extremely passionate about the betterment of the software testing craft. David has published several articles and blogs regularly at [Martial Tester](#) and [Hello Test World](#). In 2012 David founded the [Australian Workshop on Software Testing](#), Australia's only peer conference. Currently he is authoring a book on the subject of software testing and martial arts, his passion outside of work. Follow David on Twitter [@MartialTester](#).

CAN I USE THIS?

A Mnemonic for Usability Testing

David Greenlees – Innodev Pty Ltd

Who am I?

~David Greenlees~

Australian

snakes, spiders & insects

Husband & father

mar**I**al artist

relatively **New** to speaking

testing **S**oftware for 12 years

member of the Context-
driven testing community

brown-belt in the miagi-do
School of software testing

Enthusiastic about the
betterment of our craft

love asking ?s

why i love **T**esting?

why i love Usability?

member of the **C**ontext-driven testing community

Australian

relatively **N**ew to speaking

snakes, sp**I**ders & insects

why i love **U**sability?

testing **S**oftware for 12 years

Enthusiastic about the betterment of our craft

why i love **T**esting?

Husband & father

martial art**I**st

brown-belt in the miagi-do **S**chool of software testing

love asking **?**s

Why?

CAN I USE THIS?

Testing Mnemonics

"A mnemonic device is a mind memory and/or learning aid. Mnemonics rely on associations between easy-to-remember constructs which can be related back to the data that is to be remembered.", Wikipedia.

The following is a listing of software testing related mnemonics. If you know of a mnemonic I do not have listed, please [email me](#).

SFDIPOT (San Francisco Depot)

Test Strategy Heuristics by [James Bach](#)

Structure, Function, Data, Integrations, Platform, Operations, Time

[Read More](#) on the SFDIPOT mnemonic

CRUSSPIC STMPL

Quality Characteristics Heuristics by [James Bach](#)

Operational Criteria - CRUSSPIC

Capability, Reliability, Usability, Security, Scalability, Performance, Installability, Compatibility

Development Criteria - STMPL

Supportability, Testability, Maintainability, Portability, Localizability

CIDTESTD (Kid Tested)

Project Environment Heuristics by [James Bach](#)

Customers, Information, Developer Relations, Team, Equipment & Tools, Schedule, Test Items, Deliverables

[Read More](#) on the CIDTESTD mnemonic

Users

Usability is subjective; Usability
Testing not so much...

S

Standards

ISO 9241-151:2008

Ergonomics of human-system interaction -- Part 151: Guidance on World Wide Web user interfaces

“ISO 9241-151:2008 provides **guidance** on the human-centred design of software Web user interfaces with the aim of increasing usability.”

“The **recommendations** given in this part of ISO 9241:2008 focus on the following aspects of the design of Web user interfaces: high-level design decisions and design strategy; content design; navigation and search; content presentation.”

Web Content Accessibility Guidelines (WCAG) 2.0

“Web Content Accessibility Guidelines (WCAG) 2.0 covers a wide range of **recommendations** for making Web content more accessible. Following these guidelines will make content accessible to a wider range of people with disabilities, including blindness and low vision, deafness and hearing loss, learning disabilities, cognitive limitations, limited movement, speech disabilities, photosensitivity and combinations of these. Following these guidelines will also often make your Web content more **usable** to users in general.”

Heuristic Evaluation

10 Usability Heuristics for User Interface Design

- Visibility of system status
- Match between system and the real world
- User control and freedom
- Consistency and standards
- Error prevention
- Recognition rather than recall
- Flexibility and efficiency of use
- Aesthetic and minimalist design
- Help users recognize, diagnose, and recover from errors
- Help and documentation
